Knowledge Transfer in Higher Education Collaboration In The Arts And Humanities

Knowledge transfer is the process of disseminating knowledge and providing inputs to problem solving. In organizational theory, knowledge transfer is the practical problem of transferring knowledge from one part of the organization to another. Effective knowledge management, knowledge transfer seeks to organize, create, digitize and distribute knowledge to ensure its availability for future users.

Knowledge sharing is any activity through which knowledge takers, information skills, or expertise is exchanged among people. Experts, peers, teams, communities (for example, Wikis), or written or between organizations. Knowledge sharing is part of the knowledge management process. Apart from traditional knowledge transfer to face knowledge sharing, social media is a great tool because it is

Stem Knowledge - Wikipedia

The knowledge transfer of scientific knowledge—regarded as formal, certified or explicit knowledge—is knowledge that is difficult to acquire or reuse, and thus more difficult to transfer to others by means of writing it down or reworking it. This can include personal wisdom, expertise, insight, and intuition. For example, knowing that Lionel is the father of Jonathan is a piece of knowledge.
